ALICIA ESQUIVEL MOREL

PhD Candidate in Computer Science

+1 404-804-2412 ace6qv@missouri.edu

linkedin.com/in/alicesquivel https://alicesquivel.github.io/

EDUCATION

University of Missouri — **Expected Grad. Summer 2025**

Doctorate in CS (PhD CS) — *Columbia, MO*

University of Missouri — **Aug. 2018 – Aug. 2020**

Masters in Science in CS (MS CS) — *Columbia, MO*

Universidad Technológica Intercontinental — **Feb. 2008 – Nov. 2013**

Bachelor's Degree in Computer Systems Analysis (Licentiate equivalent) — *Asunción, Paraguay*

RESEARCH INTERESTS

Management and deployment of distributed cloud computing applications, Internet of Things (IoT), testbeds deployment and design of experiments, networking, network performance measurement and monitoring, cybersecurity for critical application infrastructure, Tactical Edge Network (TEN), Zero Trust.

TECHNICAL SKILLS

Python, Cloud Computing, Network Deployment, DevOps, Amazon Web Services, Azure, Google Cloud, NSF-supported testbeds (Chameleon Cloud, Cloudlab, FABRIC, ARA, AERPAW and POWDER), Linux, Mac OS, Windows OS, Graphic Design, UX, Design of Experiments, Problem Solving, Technical Writing, Presentation Skills, Applied Research, Data Analysis, Cross-functional Team Leadership, Drone Operator Part 107 License (FAA-certified remote pilot).

WORK AND RESEARCH EXPERIENCE

University of Missouri - Columbia

Graduate Research Assistant – VIMAN Lab — **May 2020 – Present**

- Conducted cutting-edge research in cloud computing, distributed networking, drone video analytics, and edge computing, with a focus on enhancing network-edge security through the Zero Trust paradigm. Developed solutions that boosted network efficiency in real-world environments, driving operational improvements.
- Played a key role in over 10 interdisciplinary research projects, contributing to 15+ peer-reviewed publications. Made advancements in the development of scalable, secure network architectures for next-generation networks.
- Leveraged NSF-funded testbeds such as GENI, POWDER, CHAMELEON, and FABRIC to transition simulation experiments to real-world applications. Innovated in-network processing techniques that resulted in improvement in data throughput using programmable data planes.
- Investigated the integration of edge computing into scientific workflows, enabling seamless access to distributed networking resources and improving computational efficiency for research teams.
- Collaborated with leading academic institutions, including The University of Chicago, RENCI, University of Southern California, University of Massachusetts Amherst, University of Washington, and University of Utah, advancing state-of-the-art networking technologies and edge computing architectures.
- Secured a top-three position in the UC2 DoD Spring 2022 White Paper Request for Information (RFI), focused on implementing Zero Trust network designs for military environments. The proposal, based on thesis research on Zero Trust at the tactical war-fighting edge, led to a $650,000 funded grant.

Graduate Teaching Assistant – EECS Department — **August 2019 – Present**

- Assisted in teaching Cyber Defense, Cloud Computing, Algorithm Design and Programming (I & II), and Web Development for undergraduate and graduate classes with enrollments ranging from 70 to 300 students. Developed and facilitated hands-on lab sessions, providing support to enhance student learning.
- Provided comprehensive teaching support, including grading assignments and exams, and mentoring students on final projects. Guided over 100 students in developing practical, real-world solutions as part of various research projects.

Mentor and Student Coordinator – REU, Consumer Networking Technologies **May – August (2022, 2021, 2020)**

- Led three cohorts of six undergraduates, mentoring over 30 students across three years. Contributed to the application review process, interviewing more than 300 prospective students.
- Mentored students in applying advanced tools, including software-defined networking (SDN) platforms and cloud orchestration systems, applying research methodologies for designing and testing UAV communication protocols, leading to peer-reviewed publications and conference posters.

University of California, Santa Cruz **May – August 2024**

Senior Fellow Summer of Reproducibility (SoR) *Remote, Santa Cruz, CA*

- Collaborated with the Open Source Program Office on the Summer of Reproducibility (SoR) project to redesign TROVI, a platform focused on enhancing the reproducibility of research experiments. Primarily concentrated on improving the user experience (UX) for researchers uploading and sharing reproducible artifacts.
- Conducted UX research and design efforts, including literature reviews and the creation of wireframes and prototypes to simplify and streamline the platform's interface.
- Optimized platform functionality by enhancing back-end integration with TROVI's API, streamlining experiment replication, and improving the reliability and reproducibility of research outcomes. The redesigned platform will be available soon for the broader research community.

Illinois Institute of Technology and The University of Chicago **May – August 2024**

Mentor REU - BigDataX: From theory to practice in Big Data computing at eXtreme scales *Chicago, IL*

- Mentored six undergraduate researchers across two cohorts, providing guidance and support throughout their research projects, leading to peer-reviewed publications and conference posters.
- Led projects in diverse fields, including self-driving cars, edge and cloud computing, 5G technology, power-efficient weather stations, smart buoy systems for coastal and marine ecosystems, and extreme learning machines for meteorological prediction, resulting in peer-reviewed publications and conference posters.

The University of Chicago **May – August 2023**

Research Assistant - Chameleon Cloud *Chicago, IL*

- Conducted research on infrastructure deployment, use-case development, and testbed establishment, contributing to the development of scalable, real-world solutions.
- Designed tools and methodologies for deploying IoT fleets using Chameleon Cloud (CHI@Edge), a container-based platform, enabling efficient management and scaling of IoT deployments.

PROFESSIONAL SERVICE

University of Missouri, Columbia **Fall 2023 – Present**

Student Employee Advisory Board *Columbia, MO*

- Represented the interests and welfare of student employees, advocating for their development and well-being.
- Actively contributed to discussions and decision-making during regular board meetings.
- Provided valuable insights and recommendations to improve student employee experiences and policies.

IEEE / ACM **Spring 2020 – Present**

Peer Reviewer for International Conferences and Journals

- Reviewed papers for conferences and journals including Globecom, TNSM, Wi-DroIT, ETT, TDSC, FGCS, COMNET, IJNM, JPDC, SECON, CNSM, IPCCC, ICC, NGNI, and UCC.

Professional Affiliations

Association for Computing Machinery (ACM) **Spring 2023 – Present**
Special Interest Group in High Performance Computing (SIGHPC)

Institute of Electrical and Electronics Engineers (IEEE) **Spring 2021 – Present**
Communication Society (ComSoc), Youth Professionals, Women in Engineering

Upsilon Pi Epsilon (UPE) - University of Missouri **Fall 2021 – Present**
International Honor Society for Computing Disciplines

Awards and Recognitions

Electrical Engineering Department, University of Missouri **Spring 2024**
Outstanding Ph.D. Student Award

University Consortium for Cyber Security, Department of Defense – UC2 **Spring 2022**
Top three white paper request winner for information (RFI) to the academic community on new cyber technologies pertaining to the topic of implementing secure network designs for military environments, Zero Trust at the tactical war-fighting edge.

Scholarships and Travel Grants

National Science Foundation (NSF)-sponsored Travel Grants **2022 – 2024**

- MERIF (Midscale Experimental Research Infrastructure Forum) community workshop — Kansas City, MO
- FABRIC KNIT9 (Keeping Networks Innovative Together) community workshop — Kansas City, MO
- ISC High Performance International Workshops — Hamburg, Germany
- FABRIC KNIT8 (Keeping Networks Innovative Together) community workshop — San Diego, CA
- Super Computing'23 — Denver, CO
- ACM/IEEE Symposium on Edge Computing (SEC 2023) — Wilmington, DE
- AraFest'24 | ARA Annual Community Event — Ames, IA
- MERIF (Midscale Experimental Research Infrastructure Forum) community workshop — Boston, MA
- ARA Public Launch — Ames, IA
- AERPAW'23 Community Workshop — Raleigh, NC
- Fourth Chameleon Cloud User Meeting — Chicago, IL
- POWDER-RENEW Mobile and Wireless Week — Salt Lake, UT
- FABRIC KNIT5 (Keeping Networks Innovative Together) community workshop — Chicago, IL
- IEEE International Conference on Communications (ICC) [Virtual] — Seoul, KR

University of Missouri, Columbia – EECS Travel Fellowship **2022**

- International Conference on Computing, Networking and Communications (ICNC) — Honolulu, HI

U.S. Department of State's Bureau of Educational and Cultural Affairs **2018 – 2020**

- Fulbright-CAL Scholarship, LASPAU Administered — University of Missouri, Columbia, MO
- Fulbright Intensive English Program, IIE Administered — Georgia Institute of Technology, Atlanta, GA

United States Embassy in Paraguay **2009 – 2014**

- Hayes Scholarship, Intensive English Courses — Centro Cultural Paraguayo Americano, Asunción – Paraguay
